

Alert Wristbands and Labels

Enable quick identification of special patient conditions with color-coded wristbands and labels from Zebra®. Our solutions enable compliance with state, regional and local color-coding standards for patient conditions such as allergy, DNR, fall-risk, latex-allergy and restricted limb.

Spot Alert Labels

Spot-alert color-coded labels can be adhered to any wristband and feature a strong adhesive that causes the label to tear if tampered with. They are available in standard color and designation combinations to support the most critical patient conditions.

Slim Alert Wristbands

These color-coded vinyl clip-closure wristbands are 0.625" x 10" and are pre-printed with patient conditions.

Tyvek Alert Wristbands

These color-coded Tyvek® adhesive closure wristbands are 1" x 10" and are pre-printed with patient conditions.
